

Reflection

Think about what you heard at Symposium:

1) What do you think are the most important issues or problems in the Middle East and North Africa today?

2) What were some of the better solutions you heard? What made these solutions seem good to you?

3) If you were going to participate in another conference, what additional information or facts would you want to know about?

4) In addition to the countries that were represented, and the United Nations, what other countries should have been invited? Why?

5) Do you think the problems of the Middle East and North Africa will ever be solved? Why or why not?

Remember – Draw conclusions/make predictions, use and define academic vocabulary, give specific examples, and make connections ☺
