

## Table of Contents: Chemistry B Spring 2018

The table of contents should start on page 1 of your notebook.

<b>Left Side - Processing &amp; Output (even pages)</b>		<b>Right Side - Notes &amp; Input (odd pages)</b>	
Page	Description	Page	Description
		5	<b>Notebook Rubric</b>
<b>Unit 1: Electron Dot Structures, VSEPR Geometry, Symmetry &amp; Polarity (pages 6 - 59)</b>			
<b>Unit 2: Measurement, Significant Figures, Experimental Errors, the Mole Concept, Molar Conversions, Percent Composition, and Empirical &amp; Molecular Formulas.</b>			
60		61	<b>Unit 2a Objectives</b> and midterm reflection
62	Quiz Review, Part 2 (Experimental Errors...)	63	<b>Unit 2a Glossary</b>
64	<b>Practice: Rules for Significant Figures</b>	65	Cornell Notes: Significant Figures
66	Application Making & Reporting Measurements	67	Notes: Making Scientific Measurements
68	Reporting Measurements Practice	69	Notes: Digital Measurements & Volume
70	Measurement, Accuracy, & Precision	71	Notes: Accuracy, Precision, Error, & % Error
72	Interpreting Errors, Accuracy, & Precision	73	Notes: Experimental Errors
74	<b>Examples: Significant Figures in calculations</b>	75	<b>Notes: Significant Figures in Calculations</b>
76	<b>Significant Figures Using Scientific Notation</b>	77	<b>Notes: Scientific Notation</b>
78	Molar Conversions Practice (pink)	79	Objectives: Unit 2b
80	<b>Unit 2 Test Review, Part 1</b>	81	Glossary, Unit 2b
82	Quiz Review, Part 1 (Measurement & Moles)	83	<b>Notes: The Mole Concept</b>
84	Warm-up: Molar Mass (5/1)	85	<b>Notes: Molar Mass</b>
86	Examples: Conversions & Mole Practice	87	Notes: Conversions with Moles
88	Practice - Interpreting Conversions	89	Notes: Conversions with $N_A$ and Moles
90	Applications of Molar Volume	91	Molar Volume of a Gas
92	Warm-up & <b>% Composition Practice</b>	93	<b>Notes: Percent Composition</b>
94	Empirical & Molecular Formulas with Models	95	Notes: Empirical & Molecular Formulas
96	Example 2: Finding Empirical & Molecular Formula from % Composition & MM	97	Notes: Empirical & Molecular Formula from % Composition & Molecular Mass (Ex. 1)
